

Texture Finish-White A-800

Product Description

Texture Finish is a proprietary mixture of co-polymer resins mixed with various sized aggregates. Texture Finish is designed to be applied with a hopper gun to achieve a spray texture finish, and knocked down with a trowel, or it can be left free standing. Texture Finish can be applied over any concrete substrate. Ideal for pool decks due to the knockdown texture (anti-skid capabilities), and is an approved finish over Americrete Waterproofing Base Coat lath System A-9000.

Coverage Rate

Texture Finish will cover 125 to 150 square feet per bag, depending upon the application procedure followed.

Primary Uses, Characteristics and Advantages

This product eliminates concrete removal, and is a single component mix by just adding water. Texture Finish has superior bonding capabilities, and is weather resistant. This product is water resistant, chemical resistant, and non-re-emulsifiable. Texture Finish can be applied on interior and exterior applications. This product is environmentally friendly.

Application

Mix one bag of A-800 Texture to 5 quarts of water. Put into a hopper gun at a low pressure and apply to surface. Let stand and knock down with a trowel. Then apply two coats of A-1100, A-1475 or A-4100. See Americrete's Specification A-8,000 Pool Texture Finish System for complete installation instructions.
